

## Kingston Chase Playgroup Science Fair

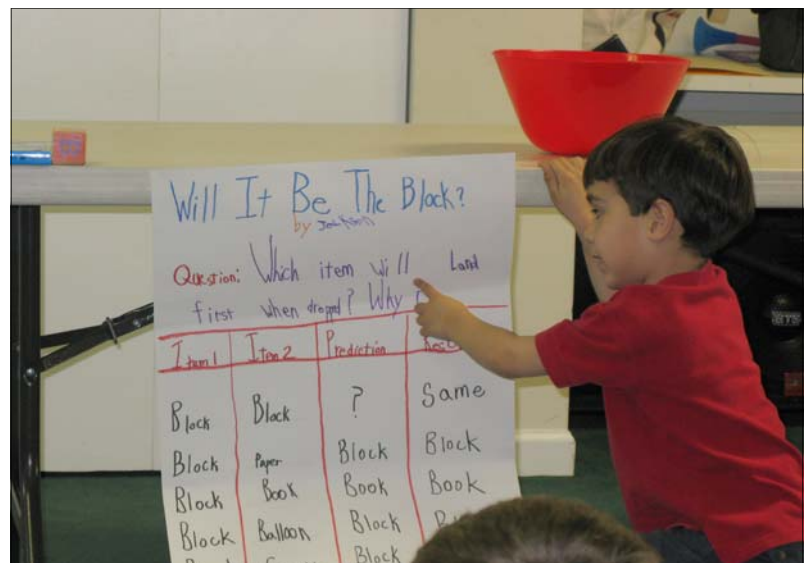

Hunter Buley demonstrates how the CO<sub>2</sub> released when baking soda and vinegar are combined can blow up a balloon.

Natalie Kapushoc shows that salt added to water can make an egg float!

Dillon Dooley and his father show off a rocket launcher that they built.

Jackson Buley explains the results of his weight and air resistance experiment.

Scout McClain demonstrates vibrations by hitting a pan and making rice move.

Jeremy Rosenwald discusses gravity and uses props to demonstrate it.

Katy Shrock holds up her color wheel to explain what happens when colors are mixed.

Lucian Kapushoc demonstrates density and buoyancy by layering different-colored liquids.

Jenny and Grace Altmiller share their shell collection.

Charlie Shulenberg talks about the results of his evaporation experiment.
